Provide a brief explanation why any checked services were not included in the Assessment:	It was verified that Splitit's back-office and enterprise services are out of the PCI scope during the PCI audit, since they are properly segmented while neither having physical nor logical access to the secure environment. In addition, the cardholder data processed in the secure environment is not backed up nor copied either fully or partially outside the CDE.

Part 2b. Description of Role with Payment Cards
(ROC Section 2.1)

Describe how the business stores, processes, and/or transmits account data.	Splitit provides payment solutions for international merchants and e-commerce owners. Splitit offers the following methods to process payments via the payment gateway 1. Embedded iFrame (MPI).

	2. Payment processing via API – supports direct and indirect payment solutions.
Describe how the business is otherwise involved in or has the ability to impact the security of its customers' account data.	Splitit uses AWS cloud services, iFrame payment component as well as direct API calls. Payment transaction services are only provided for CNP transactions.
Describe system components that could impact the security of account data.	Internal business processes not related to the splitting the payments of end customers' transactions could impact the security of the account data, yet these processes were examined during the assessment in order to confirm that they are performed in a secure manner according to the PCI-DSS v.4 requirements.

Part 2c. Description of Payment Card Environment

Provide a high-level description of the environment covered by this Assessment. *For example:* *Connections into and out of the cardholder data environment (CDE).* *Critical system components within the CDE, such as POI devices, databases, web servers, etc., and any other necessary payment components, as applicable.* *System components that could impact the security of account data.*	Splitit's PCI environment is located and hosted on Amazon Web Service (AWS). It has been confirmed that Amazon Web Service is PCI compliant by observing its valid AOC. Splitit provides payment solution for international merchants and e-commerce. To process payments via the payment gateway, Splitit offers the following two methods: • Payment processing that can support direct and indirect payment solutions. • Embedded IFrame (MPI). Splitit accepts card-not-present transactions only, allowing the merchants using its services to process online payments through Splitit services' payment gateway. The merchants using Splitit service charge their customers' credit cards for the entire sum of the purchase. Splitit stores the credit card information for monthly payments and partial processing of the spread payment.
Indicate whether the environment includes segmentation to reduce the scope of the Assessment. (Refer to the "Segmentation" section of PCI DSS for guidance on segmentation)	☒ Yes ☐ No

Part 2d. In-Scope Locations/Facilities
(ROC Section 4.6)

List all types of physical locations/facilities (for example, corporate offices, data centers, call centers and mail rooms) in scope for this Assessment.

Section 3 Validation and Attestation Details

Part 3. PCI DSS Validation (ROC Section 1.7)

This AOC is based on results noted in the ROC dated November 12, 2023.

Indicate below whether a full or partial PCI DSS assessment was completed:

☒ **Full Assessment** – All requirements have been assessed and therefore no requirements were marked as Not Tested in the ROC.

☐ **Partial Assessment** – One or more requirements have not been assessed and were therefore marked as Not Tested in the ROC. Any requirement not assessed is noted as Not Tested in Part 2g above.

Based on the results documented in the ROC noted above, each signatory identified in any of Parts 3b-3d, as applicable, assert(s) the following compliance status for the entity identified in Part 2 of this document *(select one):*

☒	**Compliant:** All sections of the PCI DSS ROC are complete, and all assessed requirements are marked as being either In Place or Not Applicable, resulting in an overall **COMPLIANT** rating; thereby *Splitit Ltd* has demonstrated compliance with all PCI DSS requirements except those noted as Not Tested above.
☐	**Non-Compliant:** Not all sections of the PCI DSS ROC are complete, or one or more requirements are marked as Not in Place, resulting in an overall **NON-COMPLIANT** rating; thereby *(Service Provider Company Name)* has not demonstrated compliance with PCI DSS requirements. **Target Date** for Compliance: YYYY-MM-DD An entity submitting this form with a Non-Compliant status may be required to complete the Action Plan in Part 4 of this document. Confirm with the entity to which this AOC will be submitted before completing Part 4.
☐	**Compliant but with Legal exception:** One or more assessed requirements in the ROC are marked as Not in Place due to a legal restriction that prevents the requirement from being met and all other assessed requirements are marked as being either In Place or Not Applicable, resulting in an overall **COMPLIANT BUT WITH LEGAL EXCEPTION** rating; thereby *(Service Provider Company Name)* has demonstrated compliance with all PCI DSS requirements except those noted as Not Tested above or as Not in Place due to a legal restriction. This option requires additional review from the entity to which this AOC will be submitted. *If selected, complete the following:*
